

CLASSIC_{Fx} PEARLS_{tm}

Description

ClassicFx Pearls_{tm} are true mica based pearlescents where various colors of metal oxides have been deposited on natural or synthetic Mica to generate effect colors ranging from satin like shimmer to sparkling brilliance. Color shifting at various viewing angles is also common to ClassicFx Pearls. This pearl technology has been used in OEM automotive and custom finishes for decades to give us the cool color stylings we have all enjoyed.

Components

CP-01 White
CP-02 Green
CP-03 Blue
CP-04 Gold
CP-05 Violet
CP-06 Red

CP-07 Red Violet
CP-08 Blue Green
CP-09 Royal Gold
CP-10 Moss Green
CP-11 Fine Blue
CP-12 Sterling Silver

CP-13 White Shimmer
CP-21 Silver Shimmer

Mixing with Inter-Coat Clear

Mix 1-2 Table Spoons of ClassicFx Pearl_{tm} per unreduced quart of IC-101 Pearl, Flake, and Powder binder then mix well before reducing 2:1 with UreKem UR series reducer. Mix well to disperse pearl and strain with a paint filter before using.

Mixing with 2K Clearcoat

ClassicFx Pearl_{tm} may also be mixed with 2K polyurethane clearcoat for applications. Begin by activating and reducing your clearcoat per manufacturer's recommendations then add 1-2 table spoons of Screamin Pearl_{tm} per spray able quart of clear. Most people find it helpful to add a small excess of reducer to help the pearls orient for best brilliance.

Application

In general you should apply 1-2 coats of clear mixed with your pearl with 75% overlap to ensure good pearlescent orientation. Can be applied with conventional spray equipment including large tipped airbrushes. When applying be sure to walk the entire side of the vehicle before dropping down and applying the next pass of paint to ensure even application.

Read MSDS of all components before using. Use proper personal protective equipment at all times. For use by professionally trained painters. **KEEP OUT OF REACH OF CHILDREN.** Bayou Innovations, LLC warrants that its products are free from defects at time of shipping.
